PROFESSIONAL SUMMARY

UX/UI Designer with 3 years of experience designing user-centered digital experiences across web, mobile, and interactive products. Experienced in UX research, usability testing, user flows, wireframing, prototyping, interaction design, and highfidelity UI. Strong technical background in HTML, CSS, JavaScript, and Angular, enabling effective collaboration with developers and translation of design concepts into functional products. Skilled at balancing user needs, business requirements, visual consistency, and technical constraints throughout the product lifecycle.

EXPERIENCE

UX/UI Designer & Integrator

STEER STUDIOS — SAVVY GAMES GROUP

Sep 2023 - Mar 2026

Identified and resolved usability issues through UX research and usability evaluations, contributing to a 42% improvement in player engagement across key interfaces.

Shipped 10+ UI features across two projects, taking each from UX/UI concept to a functional in-game experience.

Took the in-game store from initial concept and UI design through full implementation and several rounds of iteration.

Improved navigation and task completion by simplifying key player journey and reducing unnecessary steps by 30%.

Partnered directly with Warner Bros. to keep in-game UI aligned with their visual identity and brand guidelines.

Localized UI layouts and interactions across 7+ regions and multiple languages, including Arabic/RTL adaptations, while maintaining usability, visual consistency, and brand standards.

Created UI/UX documentation and onboarding materials that standardized workflows and helped new joiners quickly adopt UI standards and implementation practices.

Full Stack Developer Intern

SAUDI INDUSTRIAL DEVELOPMENT FUND (SIDF)

Mar 2023 - Jul 2023

Translated functional and business requirements into intuitive user flows and interface solutions, balancing usability with technical constraints.

Developed responsive web interfaces using Angular, HTML, CSS, and JavaScript, applying user-centered design and UI principles throughout implementation.

Collaborated across design, development, testing, and deployment, ensuring consistent implementation of UI requirements and iterative improvements to the user experience.

Identified and resolved 25+ UI and usability issues through testing and iterative interface improvements.

Delivered technical workshops and knowledge-sharing sessions, strengthening communication and collaboration with technical and non-technical stakeholders.

UI/UX Designer Trainee

MISK FOUNDATION

May 2022 - Aug 2022

Completed 4 end-to-end UX/UI projects, applying 5+ research and evaluation methods to improve usability, navigation, and visual consistency across digital products.

Designed digital experiences using user-centered design, information architecture, interaction design, and UI principles, delivering solutions across web and mobile.

Translated user and business requirements into clear user flows, interface concepts, wireframes, and interactive prototypes.

Conducted research and usability activities with 25+ users and participants to identify pain points and validate design decisions.

EDUCATION

College of Computer and Information Science —Bachelor of Information Management

Al-Imam Mohammad Ibn Saud Islamic University

2018 - 2023

SKILLS

UX Research & Strategy: User Research · User Interviews · Usability Testing · UX Evaluation · Problem Definition · Design Thinking · User Flows · Information Architecture · Journey Mapping

Product & UI Design: Wireframing · High-Fidelity UI · Prototyping · Interaction Design · Responsive Design · Web Design · Mobile Design · Visual Hierarchy · Design Systems · Component-Based UI · Accessibility · Localization · RTL Design

Collaboration & Delivery: Design-to-Development Handoff · Cross-Functional Collaboration · Stakeholder Communication · Design Documentation · Design Guidelines · Iterative Design · Agile Development · Design QA

Development Tools: HTML · CSS · JavaScript · Angular Design Tools: Figma · Adobe Photoshop

LANGUAGES

Arabic English
